Assignment name:

Error Log Entry:

1. What Error Message did you encounter?
   None

2. What unexpected behavior did your program exhibit?
   The bowler is stuck in a mode where they skip their turn after hitting a strike

3. What caused the issue?
   I forgot to disable the mode after one throw.

4. Include a screenshot of the relevant lines of code

```
        public void updateStats() {

            if (Strike || Spare) {

                Throw = Strike ? 0 : 1;

                Score += Strike ? Bowler.StrikeReward : Bowler.SpareReward

                Strikes += Strike ? 1 : 0;

                Spares += Spare ? 1 : 0;

                Strike = false;

                Spare = false;

                TotalPinsKnocked += PinsKnocked;

                PinsKnocked = 0;

            } else switch (Throw) {

                case 1:

                    Throw = 2;

                    break;

                case 2:

                    Throw = 1;

                    Score += PinsKnocked;

                    TotalPinsKnocked += PinsKnocked;

                    PinsKnocked = 0;

                    break;

            }

        }
    }
```

5. How did you fix the issue?
   I added a case for the mode which returns the bowler's state to normal

6. Provide the corrected code or solution using a screenshot

```
} else switch (Throw) {
    case 0:
        Throw = 1;
        break;
    case 1:
        Throw = 2;
        break;
    case 2:
        Throw = 1;
        Score += PinsKnocked;
        TotalPinsKnocked += PinsKnocked;
        PinsKnocked = 0;
        break;
}
```
